09:00 – 09:40	<p>Opening Keynote: Look Beyond the Hype; Get Down to the Business</p> <p>Cloud Computing – no surprise – is this year’s hottest topic, and is already a force to be reckoned with on the business technology scene.</p> <p>This session will recap the cloud trends over the last 12 months, including how advancements in the delivery of other as-a-service products. And we will also look at the road map for 2013/2014, and the continuing concern surrounding regulation and compliance.</p> <p><u>Opening Keynote Speaker:</u> Mr. Manoj Menon Partner & Managing Director (Southeast Asia) Frost & Sullivan</p>
09:40 – 10:10	<p>Industry Keynote: Managing Legal Risks in Cloud Computing</p> <p>Cloud computing is growing at a breathtaking speed and is the fastest-growing means by which technology companies offer their products today. Regardless of the industry, cloud computing is revolutionizing the way companies manage their applications and data processing, while simultaneously being one of the least understood. However, before companies go flying in the clouds, they need to be aware of the significant legal risks and implications associated with cloud computing. This session examines how cloud computing can be adopted and the dangers avoided on a practical level.</p> <p><u>Keynote Speaker:</u> Mr. Rob Bratby Managing Partner Olswang Asia LLP</p>

The 4th Cloud Computing Executive Roundtable 2013 - Singapore

Getting Ahead with the Cloud

10:10 – 10:40

Tech Insights Keynote: What You Need from a Reliable Cloud Platform – High-Availability Connectivity, Security, Flexibility and Scalability

Business organizations are constantly facing ICT issues and challenges, from optimizing utilization of IT infrastructure, lack of skilled IT manpower, to solutions flexibility, feasibility and more. In order for us to focus and succeed in our businesses, we need a trusted service provider to relieve us from these ICT challenges so that we are not being bogged down by such operational issues. We live in the era where Cloud solutions are fast becoming omnipresent, so how do we find a trusted cloud service provider that can help us overcome these ICT challenges?

In this session, we will share on the new ICT approach for a reliable Cloud platform - with high availability, security, as well as flexibility and scalability that are vital in the Cloud era.

Keynote Speaker:

Mr. Ivan Tang
Senior Vice President, Sales
CITIC Telecom International CPC Limited

The 4th Cloud Computing Executive Roundtable 2013 - Singapore

July 9, 2013 (Tue), Singapore Marriott Hotel

Getting Ahead with the Cloud

<p>12:10 – 13:00</p>	<p>Executive Dialogue 2: Security and Privacy in Cloud Computing</p> <p>With the rapid emergence of cloud computing technologies, users are facing new risks, beyond the usual concerns of traditional IT security, caused by the external aspects of the cloud model. Cloud computing based on “Platform-as-a-Service” (PaaS) or “Software-as-a-Service” (SaaS) metaphors, presents additional technological challenges in the areas of data integrity, recovery, and tenant isolation, as well as additional legal challenges, including data auditing and regulatory compliance. Overcoming these additional risks is critical to the broad adoption of cloud technologies.</p> <p>The panelists will discuss the main security risks of cloud computing and the proposed approaches to their mitigation. They will also address the impact of these new security risks on the privacy expectations of the users.</p> <p><u>Panel Chair:</u> Mr. Michael McGowan Principal Consultant KPMG</p> <p><u>Executive Panelists:</u></p> <ul style="list-style-type: none"> • Mr. Marcus Tu, Head, Technical Services Group, AIG Asia Pacific Insurance Pte Ltd • Mr. Manoj Tewari, Senior Manager - Group Information Security, International SOS • Dr. Mun Kew Leong, Deputy Director, Institute of Systems Science, National University of Singapore • Mr. Chng Tien Wei, Head of Data Security, APCEMEA, Visa Inc.
